

SEMCO CERTIFICATION PROGRAM

At SEMCO we focus on quality and consistency. We provide our clients with the piece of mind that our certified contractors are capable to install the SEMCO Finishes to same quality as our staff. In the SEMCO Certification Program you will learn how to install our 3 Award Winning Finishes.

- **Kinu**
- **Natural Grain**
- **Polished Bond**

We have developed systems to track and show the progress of the installation. These steps are broken into 4 categories:

- Preparation System & Preparation 100
- X-Bond Application System: Scratch Coat & Finish Coat
- Color Application System
- Sealer Application

Benefits of being a SEMCO Certified Installer are:

- **Direct Referrals:** Through our national marketing campaigns we receive leads from all over the United States. As a certified installer you will exclusively receive those leads.
- **Spec Projects:** As the SEMCO Finishes are specified you will receive information enabling you to know about projects before they bid allowing for accurate forecasting and increased revenue

For more information on cost and availability please contact (800) 33-SEMCO or email us at greenmaterials@semcomfg.com

At SEMCO Modern Seamless Surface we build our business to build YOUR business.
